Colombia

Colombia	Nubia Farfan nfarfan@usaid.gov Paula Cubillos pcubillos@usaid.gov	Colombia	Competitive Agricultural Sector Program (CASE) The CASE mechanism will capitalize on USAID's substantial investment in key agricultural sectors since 2003 by transitioning from extensive on-the-ground investment to sector-level support. Based on the design of the current specialty coffee 'CAFES' program, the mechanism will work with cacao, caucho, African Palm, specialty coffee, forestry and other sector-level entities, in order to consolidate major advances in these sectors throughout the country. Small producer participation success in these sectors is fundamental to Colombia's rural competitiveness and therefore essential to GOC and USG alternative development goals. This instrument will also complement CSDI regional programming, as many of these sectors are the strategic productive crops in the regions. It is particularly important for USAID to remain engaged in these sectors to further support the small producer alliances successfully instituted with the ADAM and MIDAS programs. While support for some of these sectors is arguably well established and organized in terms of field support, many of these sectors continue to favor large producers over small farmers both in terms of technical assistance and commercialization. A greater small-farmer focus in competitive agricultural sectors is key to achieving alternative development goals. CASE will work with Colombian Ministries, Acción Social, and sector specific extension and representational institutions, or gremios, to ensure successful small-farmer models developed under ADAM and MIDAS are adopted and nationalized. Finally, this mechanism will allow the Consolidation and Livelihoods Environment Office (CLE), to maintain a scaled-down national presence with which to respond to GOC requests as appropriate. This mechanism will replace what was previously called "Competitive Rural Enterprise (CRE)" and "The Comprehensive Mechanism" or "Kitchen Sink".	NA	\$26 Million - \$34 Million	Q1, FY11	Annual Program Statement (APS)/Cooperative Agreement	Yes
Colombia	Omar Trigo otrigo@usaid.gov Cubillos pcubillos@usaid.gov	Paula Colombia	Central Region The purpose of this proposed contract is to leverage the establishment of state presence in priority municipalities under the National Consolidation Plan, once the GOC has guaranteed a minimum level of permanent security. The project will utilize an integrated approach to consolidating peace, security and development gains which will require a robust effort to create thousands of licit economic opportunities, to strengthen and link both public and private organizations, to promote citizen participation, and to support governance strengthening at the municipal and departmental levels to ensure good governance and improve local service delivery. The project will emphasize immediate, short-term interventions to meet urgent economic and social needs to demonstrate presence of the state and to help the target areas recover more quickly from the effects of the conflict and eradication. Small, quick-impact projects will help to create confidence in the GOC, provide the opportunity to build relations between communities and local government and respond to local dynamics. Longer-term interventions will be initiated simultaneously, with a particular emphasis on accompaniment and the provision of technical assistance to help permanently consolidate state presence. The Central Region will primarily focus its activities in what was previously called the "Central Band."
